To Whom It May Concern:

Coast Range Contracting Ltd. has been planting trees for our Oyster River Operation (Campbell River, BC) since 2005. In March 2008, they successfully completed a 300,000 tree contract well ahead of schedule largely due to a well organized supervisory staff and highly productive crew.

This company continues to demonstrate strong ownership support for workers safety, employee training, maintaining good client relationships, and high standards for planting quality. In addition, they have maintained market competitive pricing and continue to work with TimberWest to identify opportunities for cost savings. Consequently, Coast Range has earned "preferred Contractor" status with respect to our Spring and Fall bid work.

If you are looking to expand your contractor pool, I would certainly recommend that you give Coast Range Contracting Ltd. serious consideration.

Yours truly,

Bill Grutzmacher
Operations Forester
